

Coinstar® machine

The Coinstar machine is our main consumer touchpoint. Our machine must always be presented in its best light, so it is important that machine images appear as specified in this guide. When using a machine image, please ensure that it is legible and unaltered. The machine images may appear full-length or cropped as shown to the right. For questions about Coinstar machine images, email us at coinstarbrand@coinstar.com.

Note: The Coinstar machine graphics were updated in October of 2017 to feature the new pound coin along with other newer coins.

Please do not alter the Coinstar machine. Examples of what to avoid include:

Changing the color of the kiosk

Shrinking the kiosk below 25.4mm width

Placing the kiosk on busy backgrounds

Stretching, skewing, distorting the kiosk

Cropping off the top of the kiosk

Using outdated kiosk images that display the discontinued “round pound” coin
